                                                                                                                                                                                                                                                                                                                                                     Sequence 99, Application US/09602877A

Sequence 99, Application US/09602877A

Patent No. 6432707

SERERAL INFORMATION:

APPLICANT: Xu, Jiangchun

APPLICANT: Viangchun

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR THE THERAPY

TITLE OF INVENTION: COMPOSITIONS OF BREAST CANCER

FILE REFERENCE: 210121.446C5

CURRENT APPLICANT: US/09/602,877A

CURRENT FILING DATE: 2000-06-22

NUMBER OF SEQ ID NOS: 107

SOFTWARE FEASTSEQ for Windows Version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     271 AAGGGCCAAAAAGGAGACCCTGGAAAAAGTCCGGATGGTGATAGTAGCCTG--

Fatent No. 6410714
GENURAL INFORMATION:
APPLICANT: Weber, Eric R.
TITLE OF INVENTION: NOVEL CANINE LOW AFFINITY IGE RECEPTOR (CANINE CD23)
TITLE OF INVENTION: PROTEINS, NUCLEIC ACID MOLECULES AND USES THEREOF
TITLE REPERENCE: AL-5
CURRENT APPLICATION NUMBER: US/09/535,521
CURRENT FILING DATE: 1999-03-24
EARLIER FILING DATE: 1999-03-24
NUMBER OF SEQ ID NOS: 26
SOFTWARE: Patentin Ver. 2.1
SEQ ID NO 17
